Welcome to our Educational Team!

Our vision at the Wichita State University's Physician Associate Program is "excellence in PA education." As a clinical preceptor, you are an integral part of our success, the success our students, and ultimately the high-quality healthcare that our future PAs will provide to the residents of Kansas and beyond.

In this new era of our profession, your support of our clinical year students will help lead the next generation of providers that will respond to the ever-changing needs of our healthcare system. As the demands from this system increases, our profession needs to respond through availability, affordability, and ability. We believe the high-quality education provided at WSU's PA program, and your clinical training, is responding to the call to increase availability of providers, creating a culture of providers

- o Will the preceptor be busier?
- o How patients will be scheduled for the student

The staff of a clinical site has a key role in ensuring that each student has a successful rotation. By helping the student learn about office, clinic, or ward routines and the location of critical resources, they help a student become functional and confident.

Please encourage your office staff to contact the program if they have questions or would like additional information:

Student Evaluations (Overview)

competency in these basic skills is essential for the graduating PA. Students are NOT expected to acquire all these skills within a single rotation. This preceptor assessment is not calculated into the course grade for an individual rotation; however, preceptors are asked to assess their performance at the end of each rotation to ensure that they are making adequate progress. Students are expected to achieve a rating of "3 – able to perform independently" for each clinical skill prior to Program completion. Student proficiency in performing the listed clinical skills should be assessed utilizing the following scale:

3 – a b l e t o p e r f o r m i n d e p e n d e n t l y

2 – able to perform with supervision

1 – attempted but needs further training

0 – not applicable/not observed

Student Responsibilities (Overview)

Student Responsibilities

In addition to adhering to the standards of professional conduct outlined later in the handbook, students are expected to perform the following during their clinical rotations:

- x Obtain detailed histories and conduct physical exams, develop a differential diagnosis, formulate an assessment and plan through discussion with the preceptor, give oral presentations, and document findings
- x Perform and/or interpret common lab results and diagnostics
- x Educate and counsel patients across the lifespan regarding health-related issues
- x Attend clinical rotations as scheduled in addition to grand rounds, lectures, and conferences, if available to them
- x Demonstrate emotional resilience and stability, adaptability, and flexibility
- x Notify preceptors of all absences (planned or otherwise) in a timely manner
- x Be sure all financial obligations are satisfied before leaving a rotation (e.g. room-key, deposits, returning all rotation property)

Student Attendance Expectations

1. Designated State/University holidays Students are aware there are not guaranteed holidays during the clinical year. Students are expected to be at the clinical rotation site for any days surrounding holidays when the rotation site is in operation. If the clinic/office is closed the day prior to the holiday and the preceptor will not be available, students may be given the day off as well. Students will be given rotation schedules to include Program approved holiday breaks for Thanksgiving and Christmas prior to starting second year clinical rotations.
2. Planned Absences Expected absences must be approved in advance with the preceptor and with the Program. If the Program requires the student to be gone from a rota.7 (u)5.3 (r)3.2 (r)1(in)25.3 (e)8.3 (p)-0)2.7 (r)10.5c)-1.9 i)2e1 (v)-5.6 (a)

Learning Outcomes and Instructional Objectives

The clinical year takes students from the theoretical classroom setting to an active, hands-on learning environment to prepare them for a lifetime of continued skill refinement and expanded knowledge as a practicing PA. Mastery of clinical knowledge and skills is gradual and does not occur with any single exam, course, or rotation. The process takes time, study, and focused effort. Typically, during the first three months of clinical training, students begin to develop basic skills. During the fourth through seventh months, students gain confidence and improve clinical skills. From the eighth month forward, students refine their clinical skills and continue to build medical knowledge. Students must fully engage during the clinical year to improve their history taking, diagnostic, therapeutic, communication, critical-thinking and decision-making skills.

Multiple Instructional Objectives are provided with each Learning Outcome. The primary goal of the Instructional Objectives is to guide students in their studies by describing what the learner will be able to do after completing a unit of instruction. Some of the Instructional Objectives are written to assist students in achieving the intended behavior (the Learning Outcome) during the clinical rotation, while other instructional objectives are written to indicate the behaviors expected of students at the end of the clinical rotation.

Emergency Medicine: Learning Outcomes and Instructional Objectives

Instructions: With the GENERAL SURGERY rotation learning outcomes in mind (see back), rate the student's level of performance, taking into consideration the last five (5) patient interactions you have directly observed. The desired benchmark is "EXPECTED LEVEL of performance with supervision" for surgical patients.

Learning Outcome	EXPECTED LEVEL of performance	NEEDS IMPROVEMENT with additional
Medical History [L O 1, 2]	Conducts adequate comprehensive & focused histories for patients presenting for surgical consultation; most critical information gathered	Difficulty conducting comprehensive & focused histories; fails to gather some critical information
Physical Exam [L O 1, 2]	Completes most PE components well; usually recognizes signs & symptoms of surgical conditions & complications	Difficulty completing some PE components; fails to recognize signs & symptoms of surgical conditions or complications
Differential Diagnosis [L O 1]	Formulates adequate differential diagnoses for common problems presenting in the post-operative setting	Difficulty formulating differential diagnoses for common problems presenting in the post-operative setting
Treatment Plan [L O 2, 3]	Develops adequate plans for further evaluation, treatment, and prevention considering patient-centered compliance, cost, risk factors, & involving the interprofessional team	Difficulty developing evaluation, treatment, and prevention plans; does not use a patient-centered approach;
